

Request Publications and Videos

Last Updated Monday, 29 September 2008

The Water Conservation Office has many useful publications available. Our publications are primarily available to Albuquerque residents, but if you would like materials mailed outside of Albuquerque, please call (505)768-3655. Because our library of publications changes frequently, please indicate the type of information you would like mailed to you. You will receive all of the material available pertaining to the particular topic. Please limit your request for videos to not more than three. If you are not an Albuquerque Bernalillo County Water Utility customer, we may be able to mail you one copy. Please call (505) 768-3655 to request a copy.

For more New Mexico water conservation materials go to:
