

**SAN JUAN-CHAMA DRINKING WATER PROJECT
CONSTRUCTION UPDATE!!!**

CREWS TO PAVE MCKINNEY BETWEEN HARPER & CATHY

Securing Our Future Water Supply

NOTE: All work is scheduled weather permitting and is subject to change without notice.

Depending on weather and scheduling, crews hope to start preparing the entire roadway for paving by milling pavement on **McKinney** between **Harper and Cathy** from curb to curb starting **approximately Thursday August 2, 2007**. This means the pavement will not be completely removed. Instead the pavement will be milled off 1-1/2" on the surface. Motorists may feel a slight bump in their vehicles when entering and exiting temporarily milled areas. New pavement will be put down over the milling in order to match the existing pavement.

← Phase 1 will involve paving on the west side of McKinney between Cathy Ave. and Harper Drive, with traffic shifted to the east side of the road and one lane of traffic open in each direction.

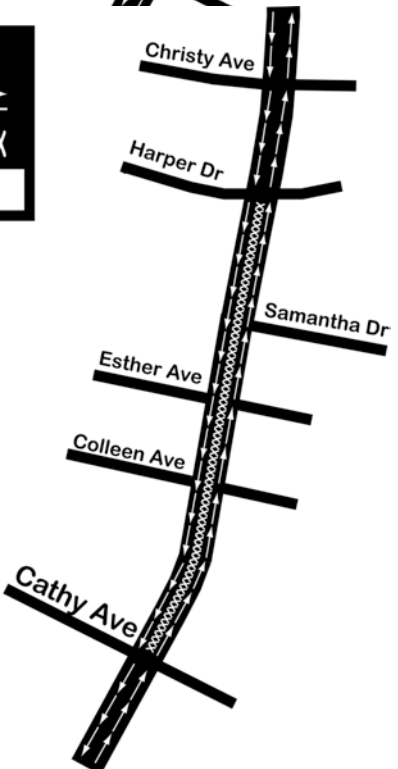

Phase 2 → will involve paving on the east side of McKinney between Cathy and Harper Drive, with traffic shifted to the west side of the road and one lane of traffic open in each direction.

← Phase 3 will involve paving the center of McKinney between Cathy and Harper, with one lane of traffic open on either side.

This process is expected to take about two weeks and last through approximately **August 16, 2007, weather permitting**.

Motorists can use Barnhart, Harper, and Burlison as alternate routes. Work hours will generally be 7:00 a.m. - 5:30 p.m. Monday – Friday. **NOTE: As crews cross individual streets, they may need to shut down intersections for a short time. Also, as crews cross driveways, residents may need to temporarily park in a different location while the pavement cures. Please contact Shannon Harris at 681-9134 or Brian Pollack at 681-0049 with any special access needs. If you would like more information, call 293-2000, 269-9691 or 306-8452 or email pattiw@cooneywatson.com.**
