            will substantially accomplish the same or similar functions to those provided by the source identified

iii. ☑ Use of goods and/or services from sources other than an Original Equipment Manufacturer will require substantial modification to equipment or systems currently in use, resulting in substantial duplication in cost to the Water Authority that is not expected to be recovered through competition and/or unacceptable delays in fulfilling the Water Authority’s requirements. If so, describe the modifications, potential costs, and/or delays associated with making substitute goods and/or services compatible with current equipment or systems (attach additional sheets if necessary):

   3. ☑ Compatibility considerations;
   4. ☑ Safety considerations;
   5. ☑ Warranty issues or guarantee of parts performance;
   6. ☑ During the system design process, several alternatives were evaluated and the current proprietary process was selected;
   7. ☐ Other (specifically describe any other reasons, attach additional sheets if necessary):

v. ☑ The goods and/or services cannot be purchased by the Water Authority from any other supplier, e.g. the supplier has a protected territory established by the original producer of the goods or services.
