

Save 2: It's Up to You!

Did you know
some of Albuquerque's
drinking water comes
from the river?

**On Track Jack describes the San Juan/Chama Project
in**

This Is the Water that Jack Drank

Albuquerque Bernalillo County
Water Utility Authority

www.abcwua.org

This is the water that Jack drank.

*Like the prickly pear cactus in this picture, Jack rabbits are very well adapted to life in the desert. Believe it or not, Jack rabbits do not need to drink water because they can get all the water they need from the food they eat. To learn how people can adapt to life in the desert, visit our website at abcwua.org.

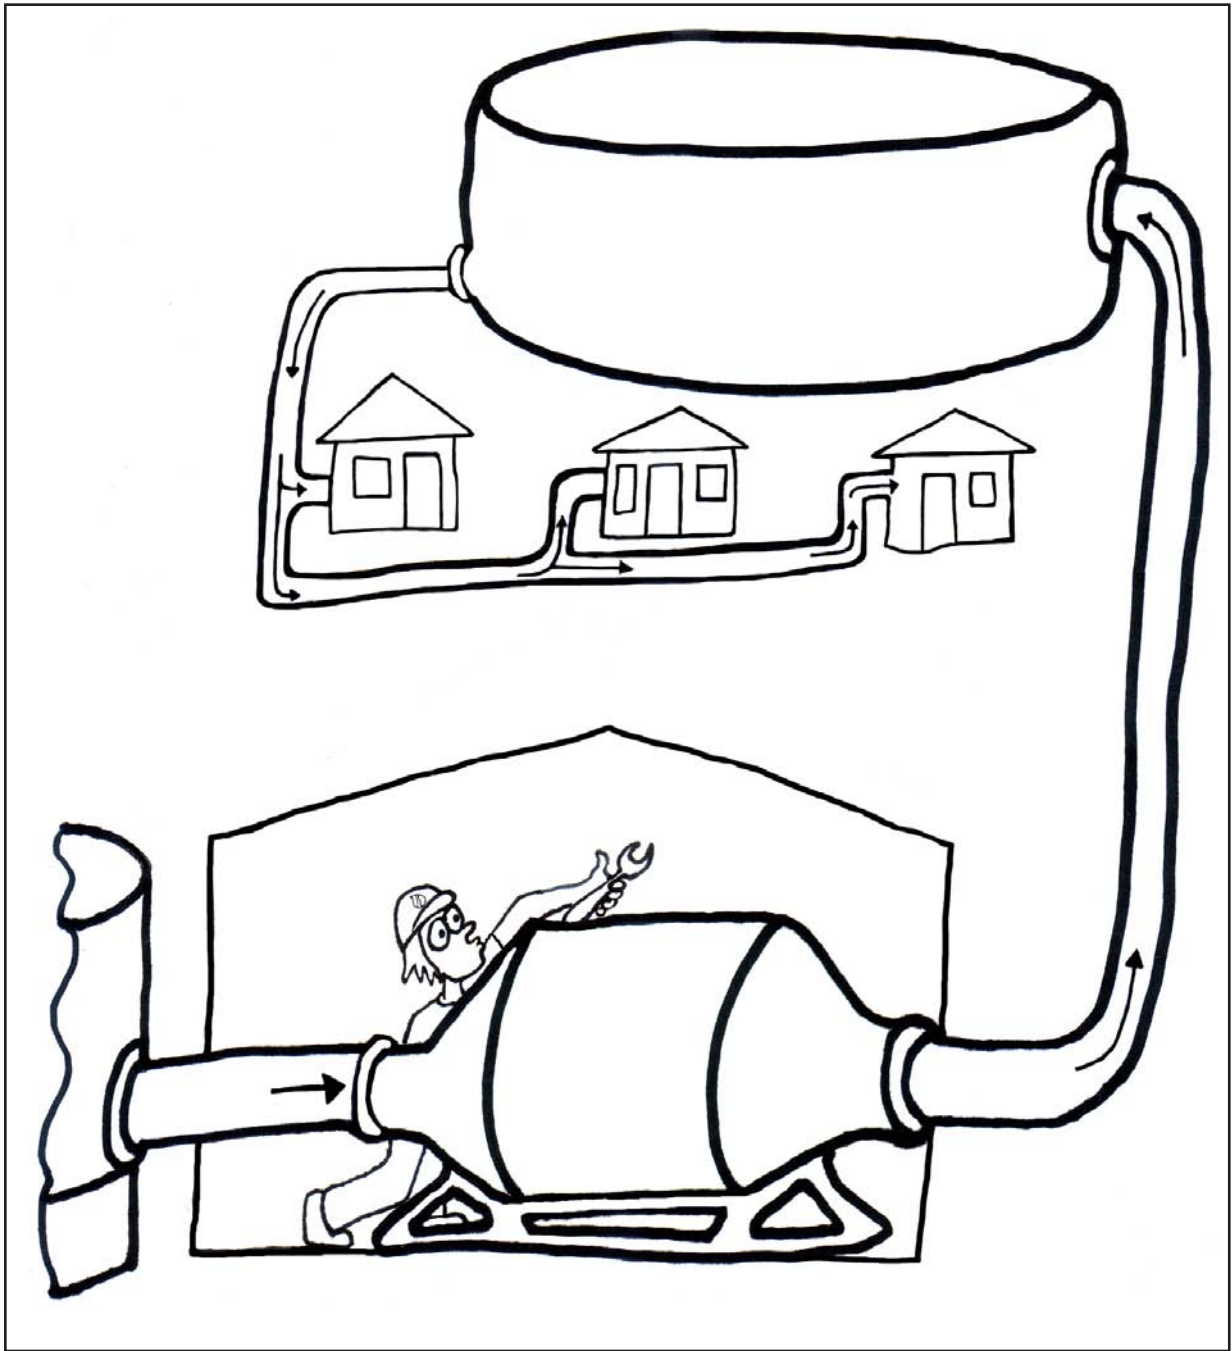

This is the cup
that held the water that Jack drank.

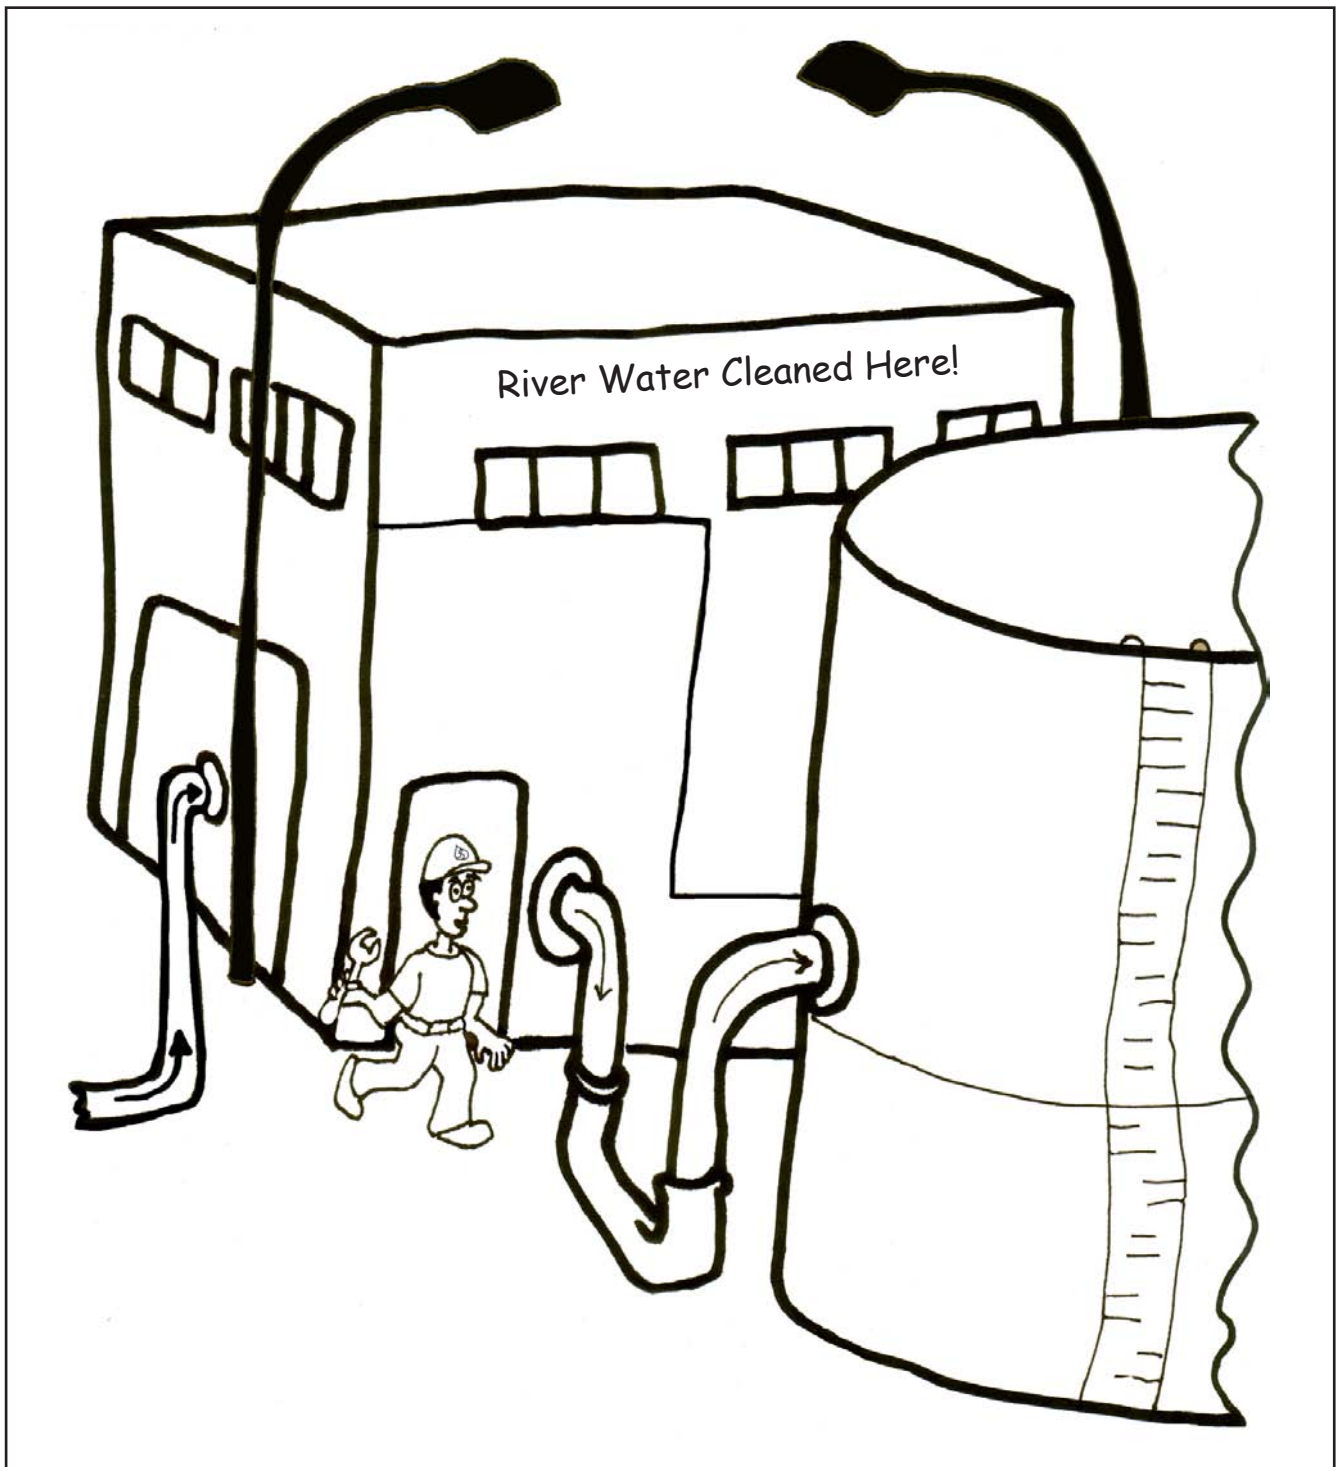

This is the faucet
that filled the cup
that held the water that Jack drank.

These are the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

This is the pump
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

This is the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

These are machines that cleaned the water
that flowed through the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

This is the dam on the Rio Grande
where machines cleaned the water
that flowed through the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

These are the people in our growing town
who built the dam on the Rio Grande
where machines cleaned the water
that flowed through the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

This is the lake where the water is stored
for the people who live in our growing town
who built the dam on the Rio Grande
where machines cleaned the water
that flowed through the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.

This is the snow that melted in spring
and filled the lake where the water is stored
for the people who live in our growing town
who built the dam on the Rio Grande
where machines cleaned the water
that flowed through the clean drinking water plant
that ran the pumps
that filled the pipes
attached to the faucet
that filled the cup
that held the water that Jack drank.
