Water Saving Tips

It's easy to turn the nozzle off when you aren't actually using the water.

Short showers save gas that heats water and electricity that pumps water.

All those drips add up to gallons of wasted water from a leaky faucet.

Faucet water should only be running when it is being used.

Water your yard less during the cool fall / spring months and not at all in winter.

Albuquerque Bernalillo County
Water Utility Authority

Movie Viewers' Guide

- 1. What are two ways that we can tell what New Mexico's climate was like in the past?
- 2. What do scientists say about how much water there is on Earth?
- 3. Why do we need to water our trees?
- 4. List three ways we can save water.

Movie Viewers' Guide Answers

- 1. What are two ways that we can tell what New Mexico's climate was like in the past? Tree rings tell us whether years were dry or wet, and pack rat middens tell us what kinds of plants were growing so we can describe the climate.
- 2. What do scientists say about how much water there is on Earth? It doesn't change.
- 3. Why do we need to water our trees? Trees provide shade and in most parts of town, the aquifer is hundreds of feet underground.
- 4. List three ways we can save water. See tips in graphic above.
