

Albuquerque Bernalillo County  
Water Utility Authority

**Note:** These uses of water and energy are NOT complete, but represent many of the ways we use water and electricity. The circles do not accurately represent the amounts that we use. Most homes and buildings in New Mexico are heated with natural gas, not electricity. However, we do use a lot of electricity to cool our homes and buildings.

40  
hojas  
de  
papel

40 hojas de papel =  
100 galones de agua

(380 litros de agua)

En NM no hacemos de estos, pero . . .

un  
pantalon

un pantalon =  
1,800 galones de agua  
(6,840 litros de agua)

En NM no hacemos de estas, pero . . .

un  
carro

una tonelada de acero se  
usa para hacer un carro =  
32,000 galones de agua  
  
(121,600 litros de agua)

un bote de  
soda de  
12 onzas

un bote de 12 oz. de soda  
= 16.5 galones de agua

(62.7 litros de agua)
