

# Animals

## Arthropods

There are sure a lot of arthropods in the bosque. Insects, spiders, butterflies, centipedes, crayfish, and even more kinds of arthropods.

- Arthropods are animals that do not have a backbone. They have a protective covering on the outside of their bodies.
- Arthropod bodies are made up of parts. For example, insects have a head, thorax, and abdomen.
- Arthropods have many legs. Those legs have joints that bend.
- Arthropods are cold-blooded.
