

Soil

Two kinds of soil. Which has more nutrients? 2016 Atrisco ES

- ♻ About 9/10 of soil is broken down rocks.
- ♻ Bacteria in the dirt break down dead plants and animals. Those nutrients are used by new plants.
- ♻ Fungi threads in the soil move nutrients to the plants. The threads join with the roots of plants.
- ♻ A handful of soil has more microorganisms in it than there are people on earth. We need that microscopic ecosystem in order to be healthy.
